

Policy, Certification, and Horizon 2020

Damien Lecarpentier
EUDAT Project Manager
CSC – IT Center for Science Ltd

Agenda

10.40-13.00	POLICY, CERTIFICATION AND HORIZON 2020 chaired by Damien Lecarpentier, EUDAT Project Manager
10.40-10.50	Open Access to Research Data & Data Management Policy - EUDAT support services , Damien Lecarpentier, Project Director, Research Infrastructures EUDAT Project Manager CSC -IT Center for Science LTD
10.50-11.10	European Digital Repository Certification: the way forward , Deputy Director Policy, DANS
11.10-12.40	Policy & Service Breakout sessions
Session 1	European Digital Repository Certification: the way forward , moderated by Ingrid Dillo, Deputy Director Policy, DANS
Session 2	EUDAT B2Service Session moderated by Mark van de Sanden, SurfSara
12.40-13.00	EUDAT in Horizon 2020 & Discussion , Damien Lecarpentier, Project Director, Research Infrastructures EUDAT Project Manager CSC -IT Center for Science LTD
13.00-14.00	Lunch & End of User Forum

Open Access Initial Principles

- Two principles on open access:
 - all data in the CDI should, in time, become full open access. Open access is the norm for CDI data;
 - embargo periods for original producers are fully supported, on condition that such data become openly accessible when the embargo period expires (“publishing windows”).
- These imply:
 - policy harmonisation
 - common licence scheme

Keeping the Balance

- Promoting common principles

- Keep research communities in the driving seat
- Take into account different approaches re. data access and reuse
- Respect national differences (legal, ethical, societal)
- Keep some flexibility for new communities to be integrated

Ongoing Survey

- Ongoing survey about licensing and policies issues on open access:
 - “We support open access but...”
 - ... we want people to sign our terms and condition document”
 - ...we want to keep track of re-usage and be contacted each time our data is being re-used”
 - ... we don't want our data to be used for commercial (or military) purposes”
- Heterogeneity of requirements is challenging for infrastructure providers!
- Huge demand for more training on licensing and legal issues
- Interested in sharing your views? Contact Marie Sandberg (marie.sandberg@csc.fi) and Pawel Kamocki (pawel.kamocki@gmail.com)

Data Management Planning

- DMP is A Good Thing [™]
- Part of EUDAT's mission is to disseminate and promote best practice in data management
- Collaboration with DCC to create a version of *DMPonline* following H2020 guidelines
 - Tool for EC funded projects
 - Extension to national projects later (?)
- Promote EUDAT resources!
 - EUDAT as a trusted repository for EC funded projects
 - Earmarked resources for open data pilot

Summary

- EUDAT strongly supports Open Access policy and offer tools to enable this policy
- EUDAT Open Research Data Repository (B2SHARE) can be used by EC funded projects to release their research data
 - Earmarked resources for Open Data Pilot
- Open Access agenda should be pushed beyond
 - making data “openable” or “FAIR”
 - Facilitating route to Open Access
