Tuesday, 11 July, 2017 to Friday, 14 July, 2017

Workshop on Ontology & Semantic Web for Biodiversity & Ecosystem Research

LifeWatch Italy and EUDAT wanted to tackle these challenges through their workshop Ontology & Semantic Web for Biodiversity & Ecosystem Research, a forum for the semantic web and linked open data communities, where professionals from Academia, Research Infrastructures, Industries and others interested in these topics were welcome to present theoretical and applied research work, share experiences and discuss the latest scientific results and technology innovations around semantic technologies and linked open data in the field of Biodiversity and Ecosystem Research.

The event particularly revolved around the following main themes:

- Usages of semantic resources in Research Infrastructures (RIs)
- Comparison among vocabulary governances
- Alignment of vocabularies and ontologies
- Services for semantics
