This [briefing paper](#), released by the OpenAIRE project, aims to support all stakeholders (including researchers, research officers, and research managers) on the topic of research data management. Among other topics the document covers data management planning, metadata, and trustworthy data archives for (open or restricted) data sharing.

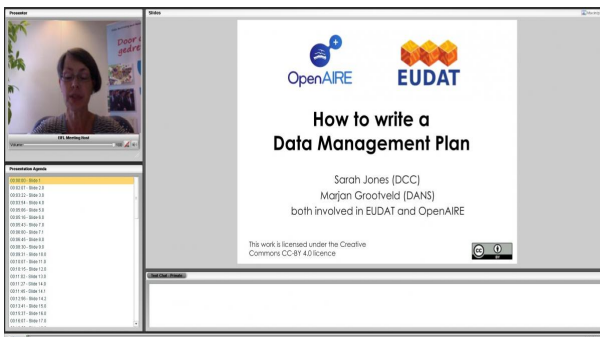

[The webinar recording from " Research Data Management - an introductory webinar" By Tony Ross-Hellauer, OpenAIRE & Sarah Jones, EUDAT](#)

This presentation was taken from the Research Data Management Introduction: EUDAT/Open AIRE Webinar
