

REMS/EUDAT AAI pilot with the Finnish language bank (Fin-CLARIN)

EUDAT conference 29 Oct 2013

Mikael Linden, CSC

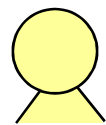

Authentication and authorisation

- 1. Authorisation
- 2. Identity
- 3. Authentication (verification of the identity)

1. "University faculty is authorised to use"

Bob Smith

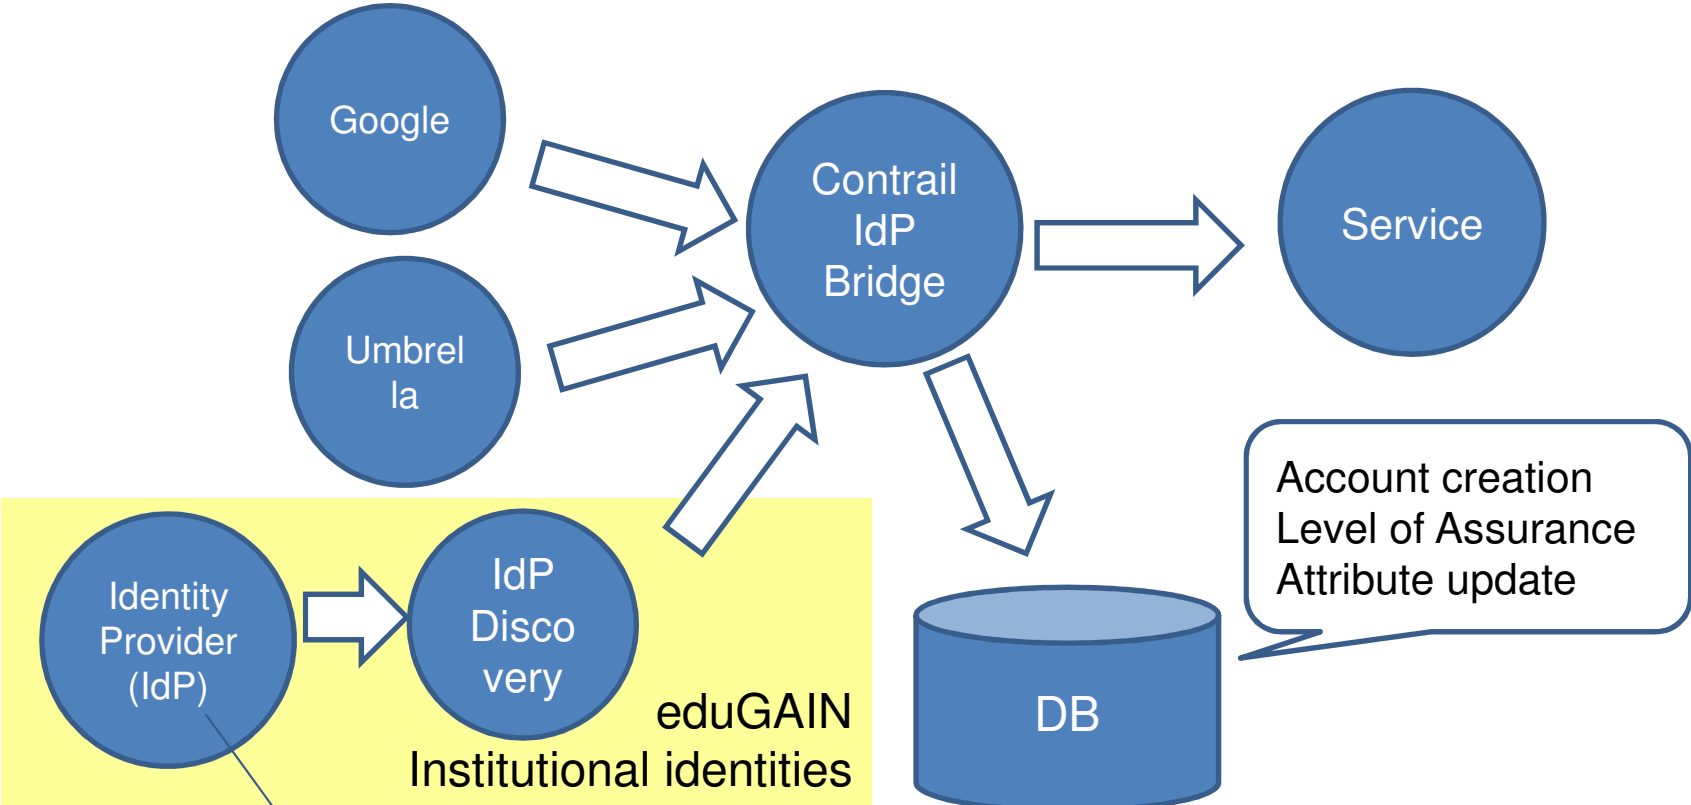

3. Uid
Password

2. Bob's identity is created to the service

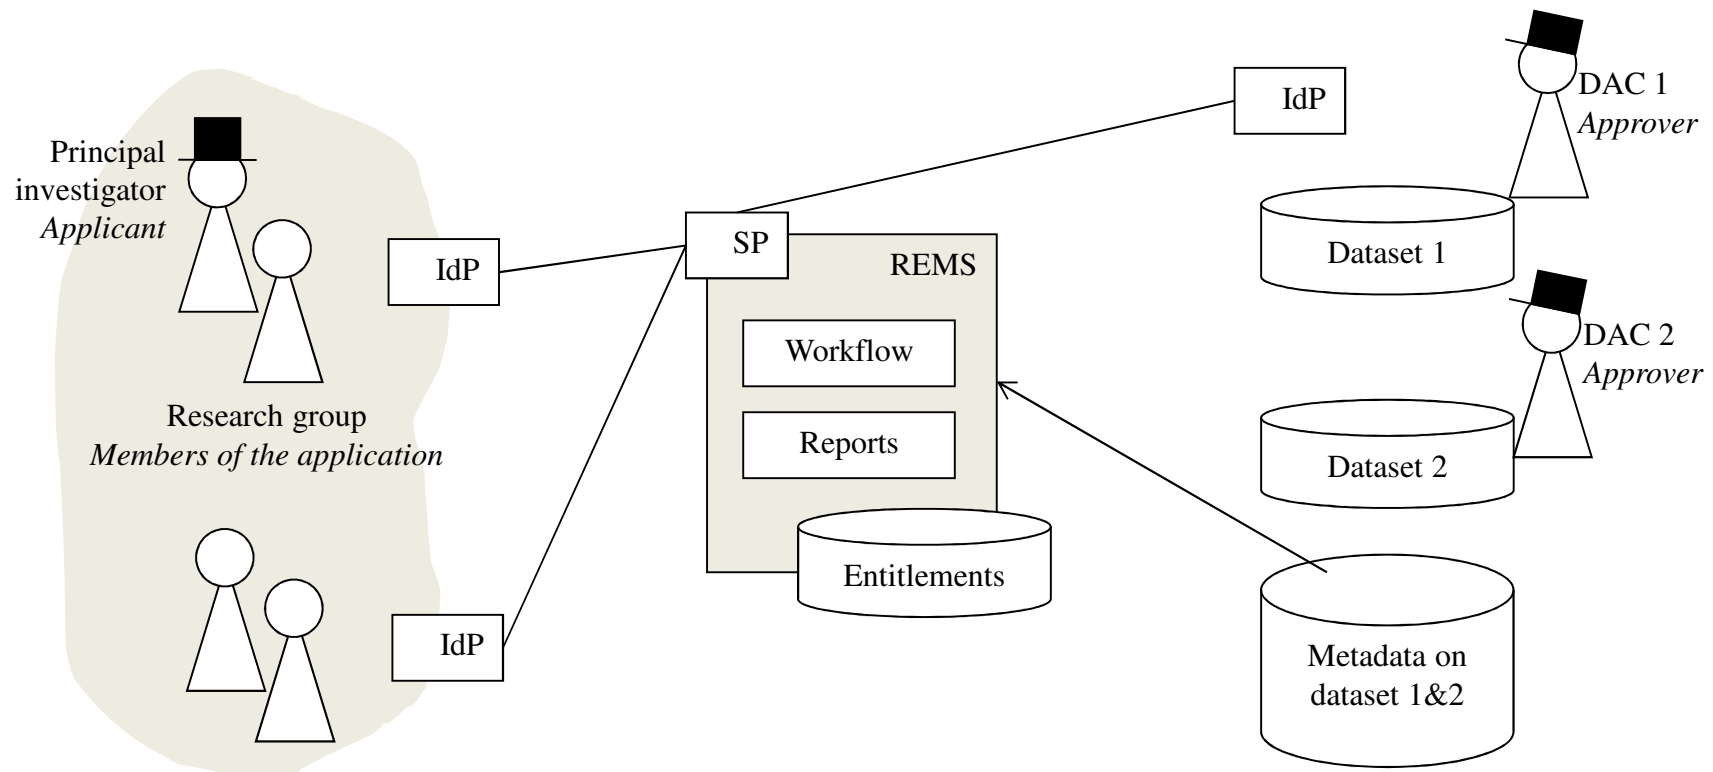

```
name: Bob Smith
uid: bsmith
password: f3Gwl8fE
role: faculty
```

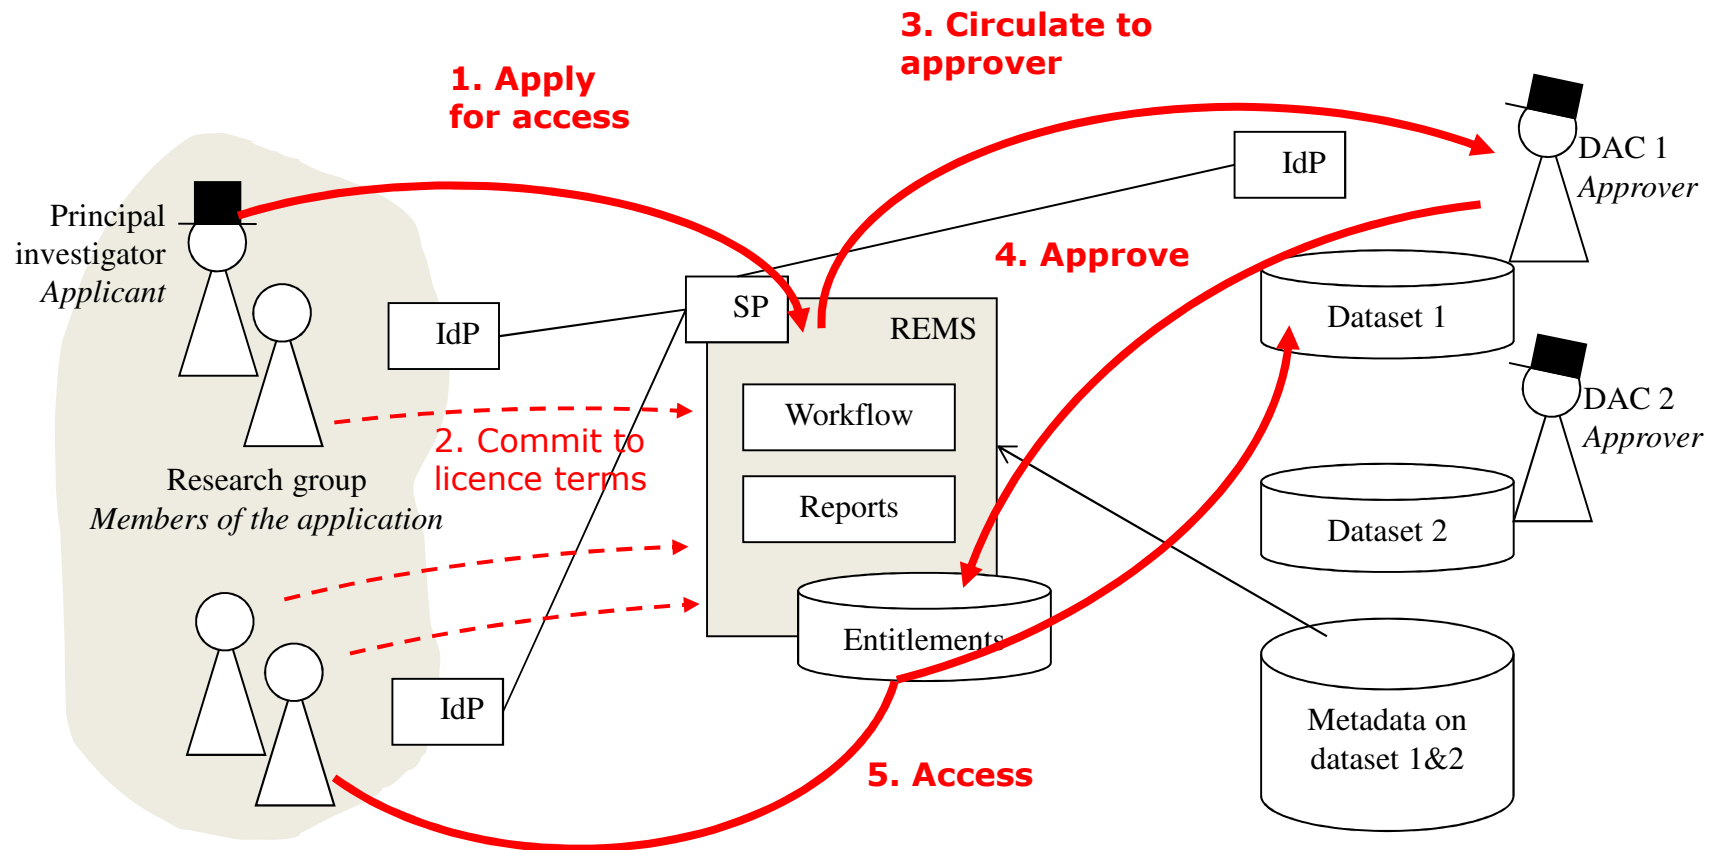

Federated identity and authentication: EUDAT leverages existing user accounts

Authorisation: The Resource Entitlement Management System (REMS)

Authorisation: The Resource Entitlement Management System (REMS)

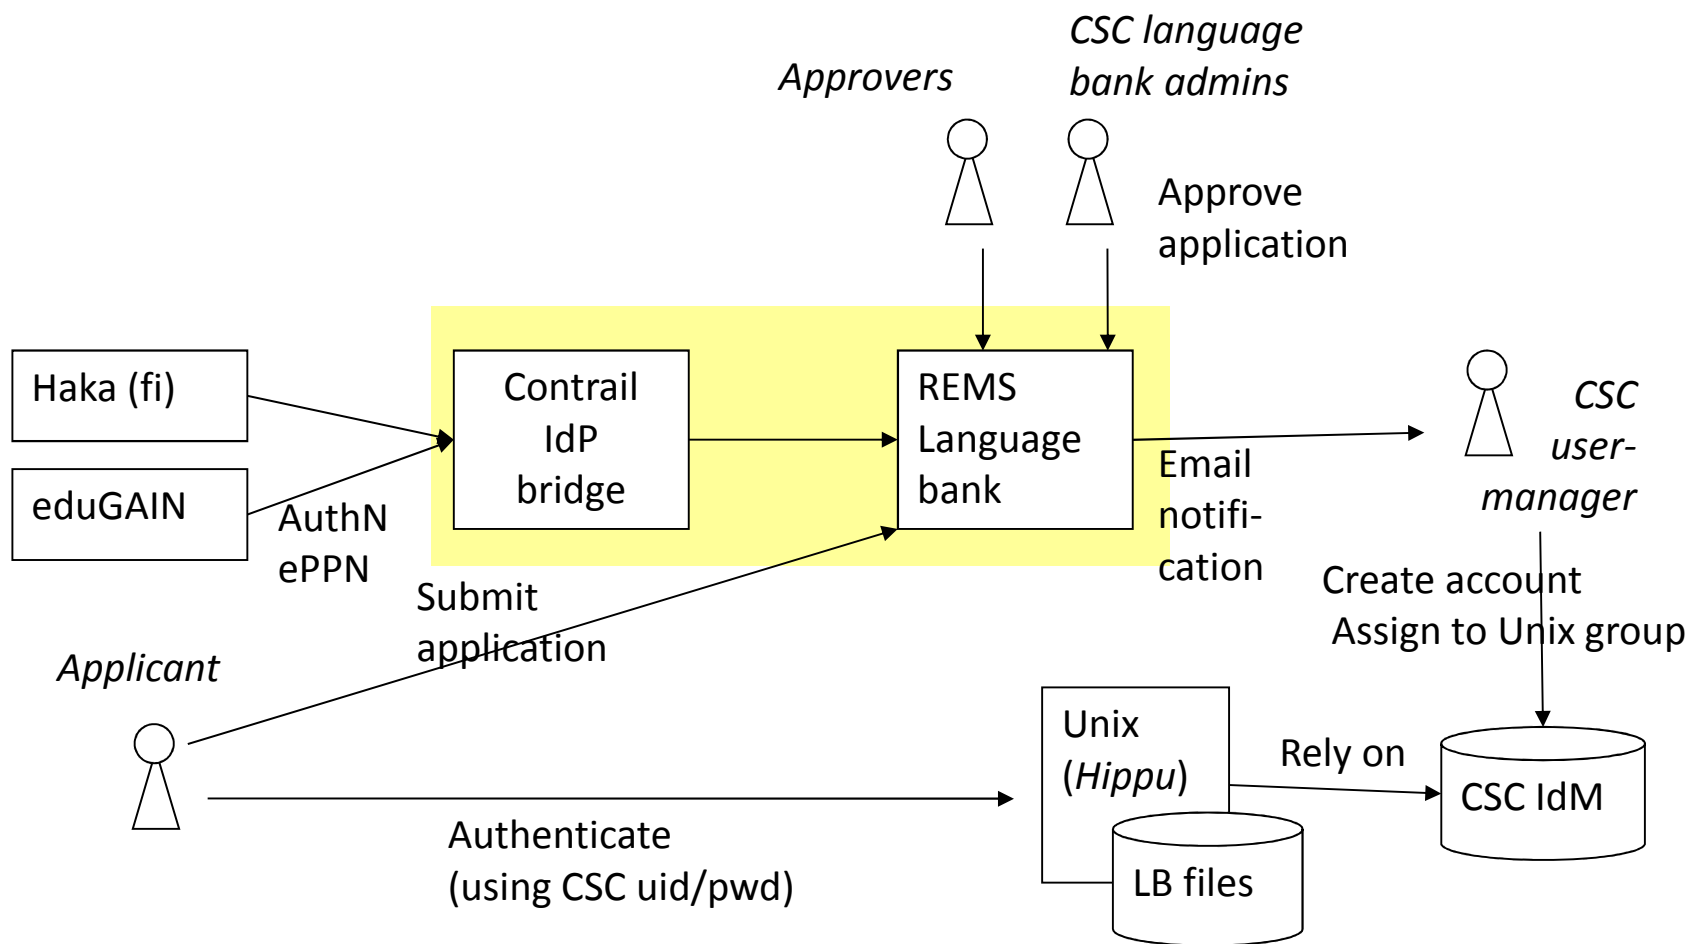

The REMS implementation

- Funded by the ELIXIR ESFRI project
- A Java portlet on Liferay, using Vaadin framework
- Open source (LGPL)
- Discipline-independent
 - Initially bioinformatics
 - Interest also in linguistics and social sciences

REMS/EUDAT/Language bank pilot

Pilot status

- Work in progress
- Contrail/REMS integration more or less done
- Language bank materials not yet loaded on REMS
- No actual pilot use carried out yet
